

POLICY BRIEF: URBAN GOVERNANCE IN INDIA

***Strengthening Local Institutions for a
Sustainable and Inclusive Urban Future***

Published by: Policy Draft Division, All India

1. EXECUTIVE SUMMARY

India's urban transition is one of the most significant demographic shifts of the 21st century. **By 2050, nearly 50% of Indians (≈850 million)** will live in cities. Urban areas already contribute **over 63% of GDP**, making them the economic backbone of the country.

Yet, cities face deep governance challenges – overlapping institutions, financial fragility, and limited citizen participation.

Strengthening urban governance is therefore essential to realize the vision of **Viksit Bharat @2047** – a developed, inclusive, and sustainable India.

KEY HIGHLIGHTS

- 480+ million urban residents (2024)
- 4,700+ Urban Local Bodies (ULBs) across India
- Urban GDP share: 63% (NITI Aayog, 2023)
- ULB revenue: 1.08% of GDP (RBI, 2022)
- 74th Constitutional Amendment (1992): Framework for decentralization
- Only 45% of cities have updated Master Plans

2. UNDERSTANDING URBAN GOVERNANCE

Urban governance refers to how cities are managed – the systems, processes, and institutions that shape service delivery, resource management, and citizen engagement.

It involves coordination among:

- **Urban Local Bodies (ULBs):** Municipal corporations, councils, nagar panchayats
- **State Governments:** Oversight, financial support, planning
- **Parastatal Agencies:** Water boards, development authorities, housing agencies
- **Citizens & Civil Society:** Through Ward Committees, Area Sabhas, and digital platforms

Goal: Decentralized, transparent, accountable, and citizen-centric governance.

3. GOVERNANCE FRAMEWORK

Level	Institution / Actor	Key Functions
National	MoHUA, NITI Aayog	Urban policy, funding, national missions
State	Urban Development Departments	Oversight, parastatal management
Local	Municipalities, Corporations	Service delivery, planning, taxation
Community	Ward Committees, Area Sabhas	Citizen participation, monitoring

CONSTITUTIONAL FOUNDATION:

- 74th Amendment (1992) – decentralized governance through 18 functions (12th Schedule).
- Mandates State Finance Commissions, Metropolitan Planning Committees, and District Planning Committees.

4. CHALLENGES IN URBAN GOVERNANCE

Category	Key Issues	Example / Data
Institutional	Overlapping mandates, weak coordination	Multiple agencies in Bengaluru (BDA, BBMP, BWSSB, BMTC)
Financial	Low revenue base, dependency on grants	ULBs generate only 1% of GDP
Capacity	Shortage of skilled staff, lack of urban professionals	Only 60% of sanctioned posts filled (NITI Aayog, 2021)
Participation	Ward Committees largely inactive	Functional in <20% of cities
Planning	Outdated Master Plans, informal growth	35% of urban population in slums

5. MAJOR URBAN GOVERNANCE INITIATIVES

Programme	Launched	Focus Area	Key Outcome
Smart Cities Mission	2015	Data-driven governance, ICT-based service delivery	100 smart cities, ICCCs established
AMRUT / AMRUT 2.0	2015 / 2021	Water supply, sewerage, green spaces	Universal water supply target
Swachh Bharat Mission (Urban)	2014	Sanitation, solid waste management	100% ODF+ in major cities
PM Awas Yojana (Urban)	2015	Affordable housing	1.2 crore houses sanctioned
National Urban Digital Mission	2021	Digital platforms, data interoperability	Unified digital infrastructure for cities
Urban Infrastructure Development Fund (UIDF)	2023	Tier-2 & Tier-3 city infrastructure	₹10,000 crore annual corpus

6. BEST PRACTICES ACROSS INDIA

City	Initiative	Impact
Indore	Citizen-led waste segregation, GPS waste tracking	India's cleanest city 7 years in a row
Pune	Municipal bonds for water and waste projects	₹200 crore raised; improved creditworthiness
Surat	Smart data platform, flood early warning	Real-time urban monitoring
Chennai	Integrated stormwater management	Reduced flood risk in coastal areas

7. POLICY PRIORITIES & RECOMMENDATIONS

A. EMPOWER LOCAL GOVERNMENTS

- Fully devolve 18 functions under the 12th Schedule
- Strengthen State Finance Commissions for predictable transfers
- Encourage municipal bonds and land value capture financing

B. ENHANCE CAPACITY

- Create an Indian Urban Service Cadre for professional governance
- Build local data, GIS, and planning capacity through continuous training

C. INSTITUTIONAL COORDINATION

- Set up Metropolitan Governance Authorities for megacities
- Merge overlapping parastatal functions under city governments

D. PROMOTE CITIZEN-CENTRIC GOVERNANCE

- Operationalize Ward Committees and Area Sabhas
- Use digital grievance systems, mobile dashboards, and social audits

E. LEVERAGE TECHNOLOGY

- Scale Integrated Command and Control Centres (ICCCs) for all Class I cities
- Integrate GIS, IoT, and AI for predictive service delivery

F. BUILD CLIMATE-RESILIENT CITIES

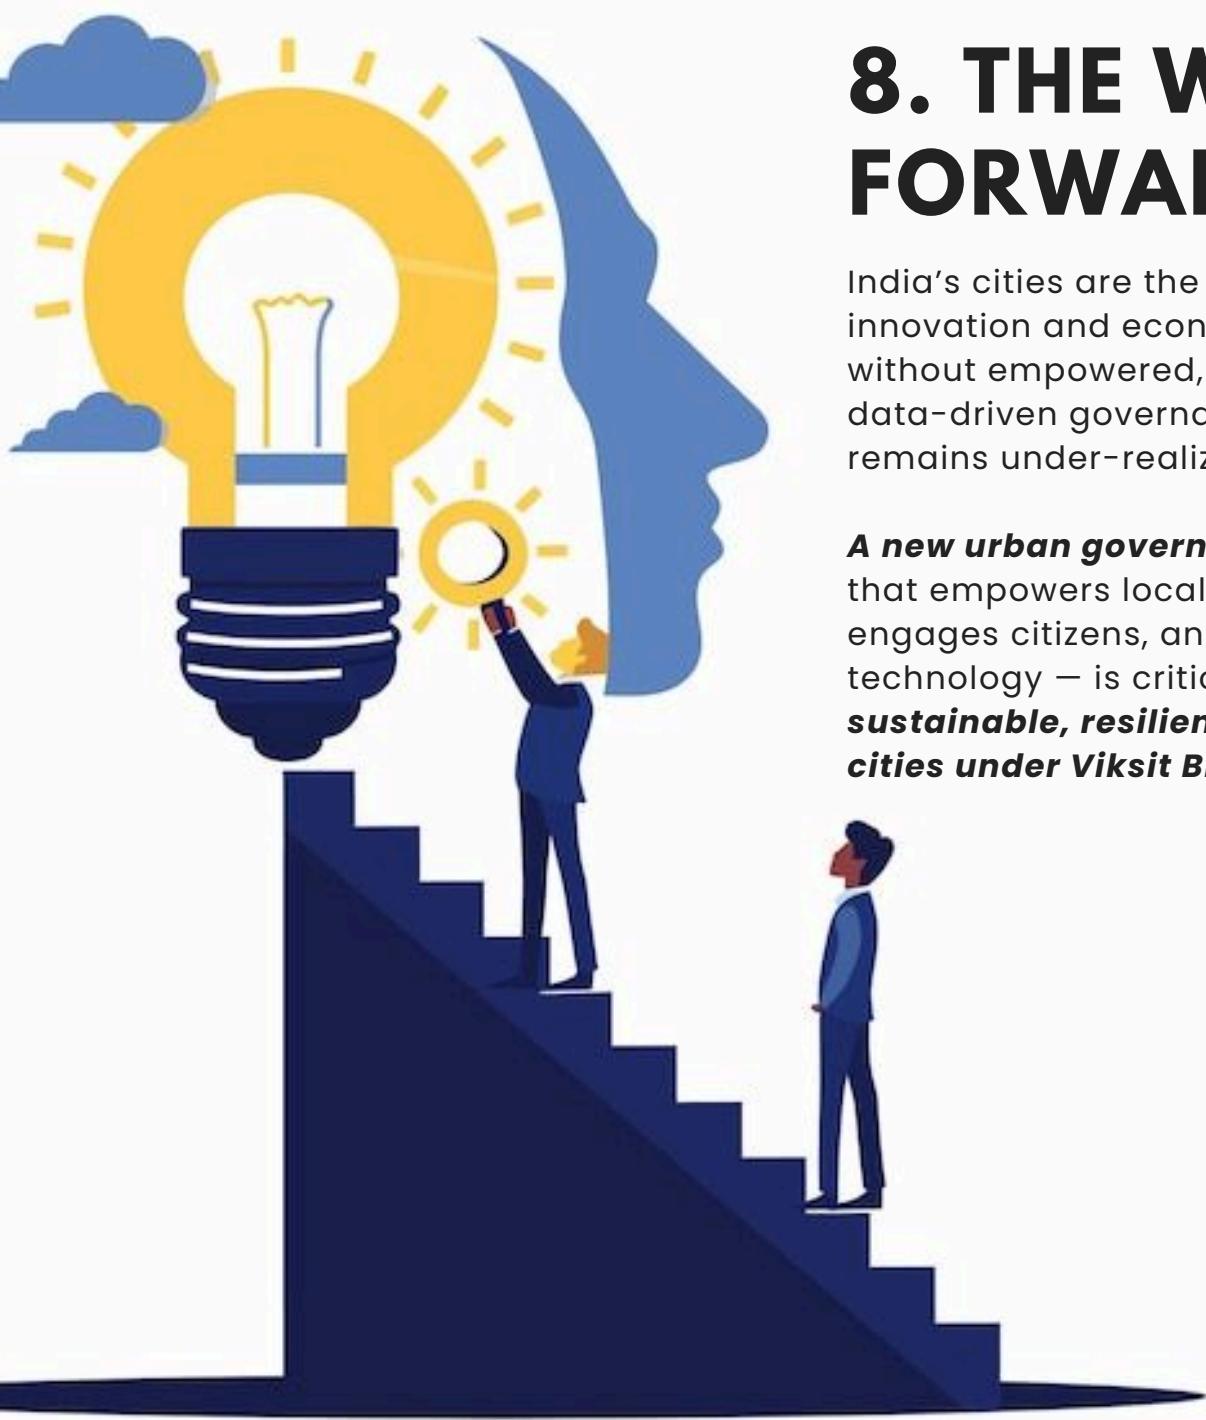

- Mainstream nature-based solutions, urban forests, and water-sensitive planning
- Prepare city-level Climate Action Plans

8. THE WAY FORWARD

India's cities are the crucibles of innovation and economic dynamism. Yet, without empowered, accountable, and data-driven governance, their potential remains under-realized.

A new urban governance compact – one that empowers local governments, engages citizens, and leverages technology – is critical for **building sustainable, resilient, and inclusive cities under Viksit Bharat @2047**.
